

## Pipercleaner Sei

**Audience:** all ages

**You will need the following for each Sei:**

11x pipe  
cleaners  
Scissors  
Florist tape  
4x stamens

**Session length:** 20+ mins

### **Preparation:**

Gather your materials

1

Take two pipe cleaners. Bend both in half.

2

Take one of those pipe cleaners and bend in half again.

3

Slot the middle of each pipe cleaners together and twist to secure

4

Bring longer ends together and bend it into a loop (like a raindrop or oval shape).  
Use one long side to twist the ends together at the bottom to hold the shape

5

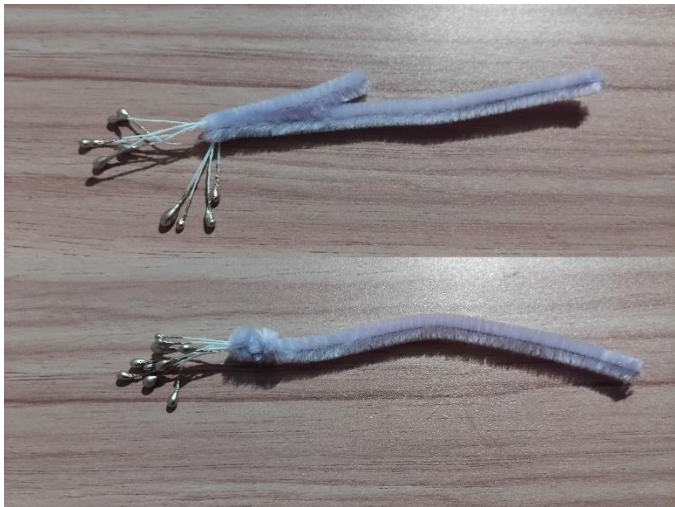

Repeat steps 1-5 until you have 5 petals

6

7

Wrap one end around the centre of 3-4 stamen, twisting tightly so that it stays in place.

8

Take each petal and wrap evenly around the middle stem with the stamens. Use scissors to trim excess petal stems

Stretch out florist tape (this makes it sticky)  
Wrap it around the twisted centre and down  
the stem until whole stem is covered

Gently spread out your petals to form  
desired flower shape!
