

Matariki Large Paper Star Make Sheet

Ngā Tohutohu | Instructions

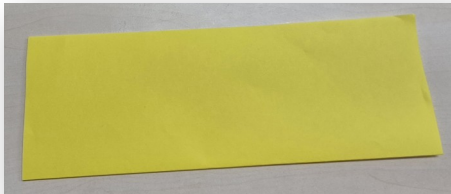

You will need:

- A blank A4 piece of paper
- Scissors
- Glue stick
- Colour In stuff - optional

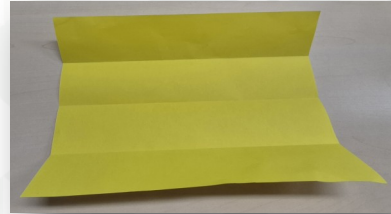

These stars are made like the little ones but only bigger...

First, fold your paper in half

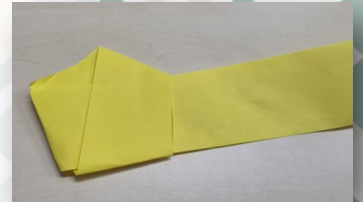

Next, fold each half of your paper in to the middle so you end up with 4 strips

Now, cut out the 4 strips and glue each end together to make one long strip

Then, make a loop at one end and tuck the short end up into the loop to create a pentagon like this with a long tail

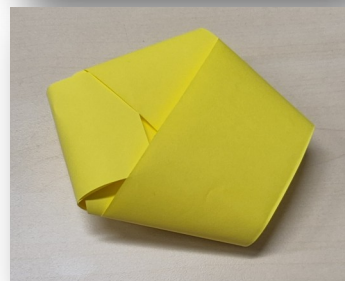

Next, wrap the long tail around the pentagon in the direction it faces.

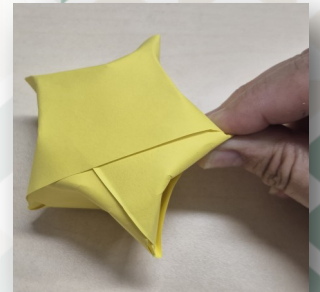

Lightly mark the fold line as you go

Do not crease the fold tightly

Continue to fold the strip over and over each side until you are left with a short piece that can't be folded over a side. Now tuck this in .

To finish, Now, press each point of the pentagon to make your star points

Ta daaa!!!
