

Dinosaur Finger Puppets

Audience: Younger primary

You will need the following:

- Blank card/paper
- Pre-drawn templates
- Colouring in materials
- Scissors
- Tape

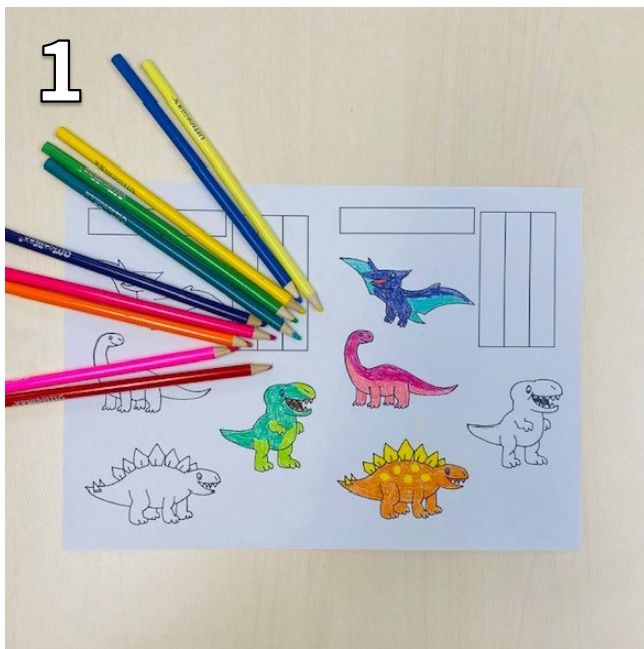

Session length:

30 minutes - depends how many are made

Preparation

Make some examples

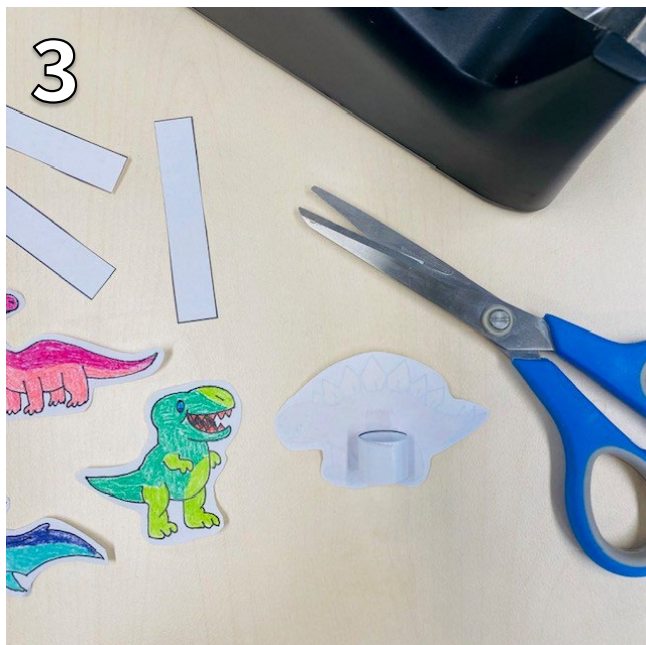

1
Draw your own dinosaur or choose a pre-drawn dinosaur and colour in.

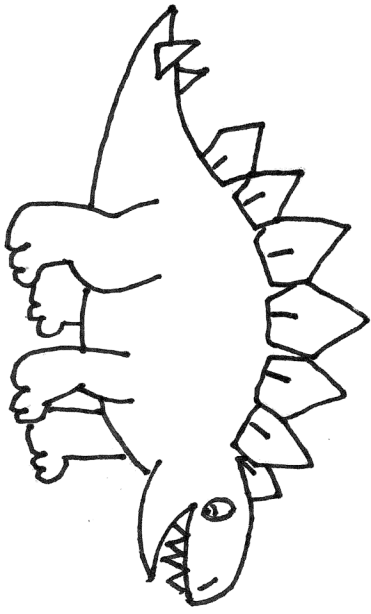

2
Cut loosely around your dinosaur (leave some white around the edge as it's easier than cutting right to the line).

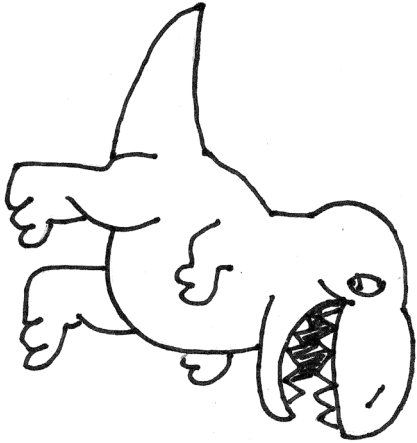

3
Cut a strip of paper (on the template) and loop around your finger and stick together with tape. Then tape the loop to the back bottom of the dinosaur with tape. (You could attach a popsicle stick instead of a finger loop).

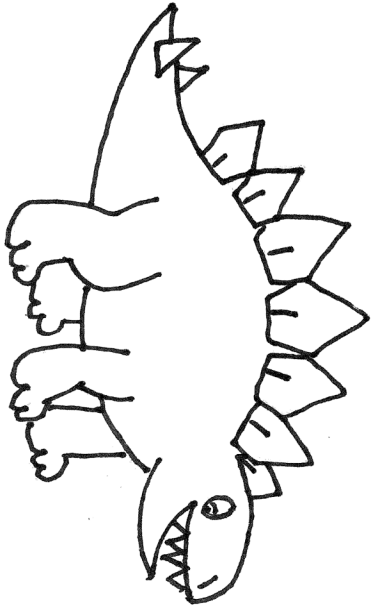

4
Repeat with additional dinosaurs! Put on a prehistoric puppet show for your friends and family!
