

Dinosaur Headband

Audience: Preschool/younger primary aged children

You will need the following:

- 1 x A4 card headband template – any colour
- 2 x A4 paper spike templates – any colour
- Scissors
- Stapler
- Staples
- Glue stick

Session length:

Approx 1 hour

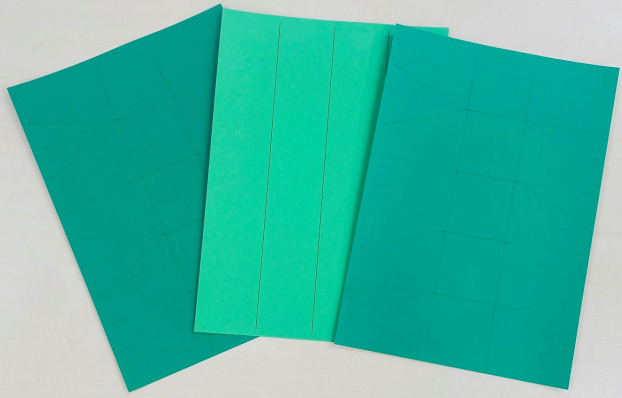

Preparation

Make an example

Optional: Precut templates

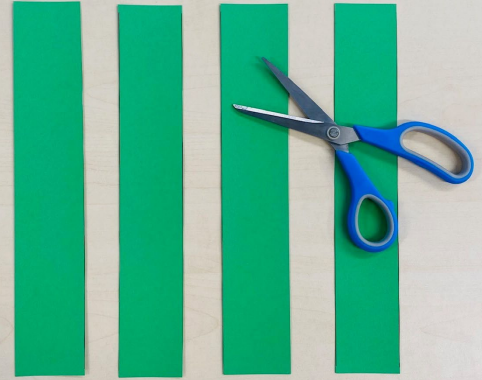

1

You need two spike templates and one headband base template. Any colour works, you can mix and match!

2

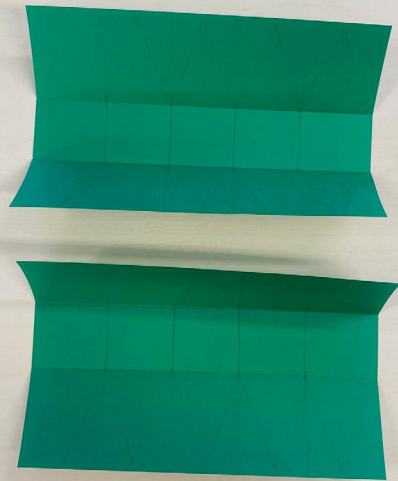

Cut the headband template into 4 strips.

3

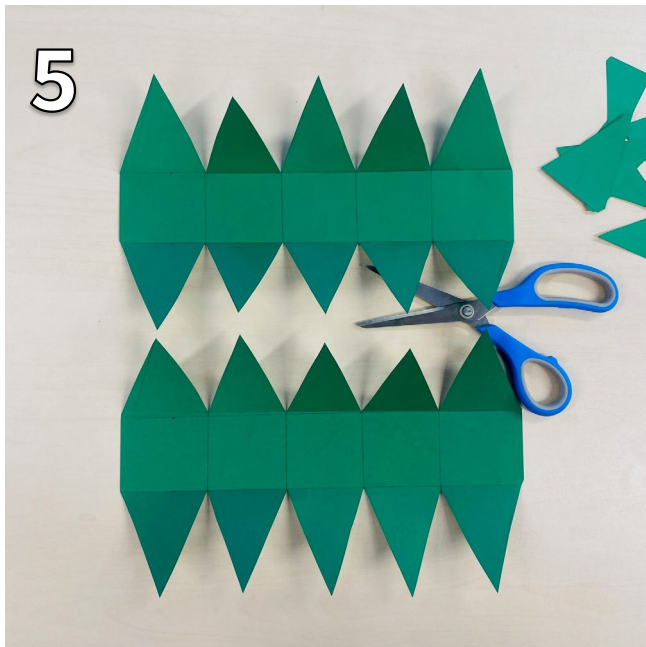

Staple two together to make a headband. Make sure the smooth part of the staple is in on the inside and the rough part on the outside. (Measure around the child's head if necessary).

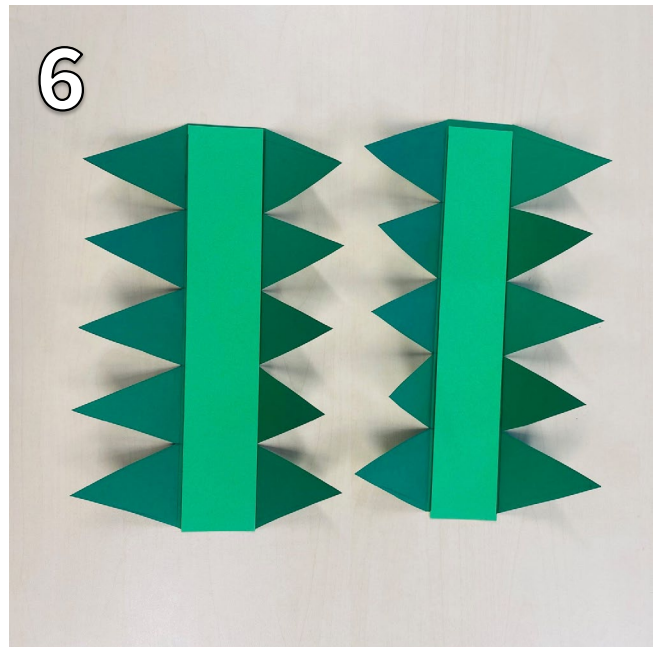

4

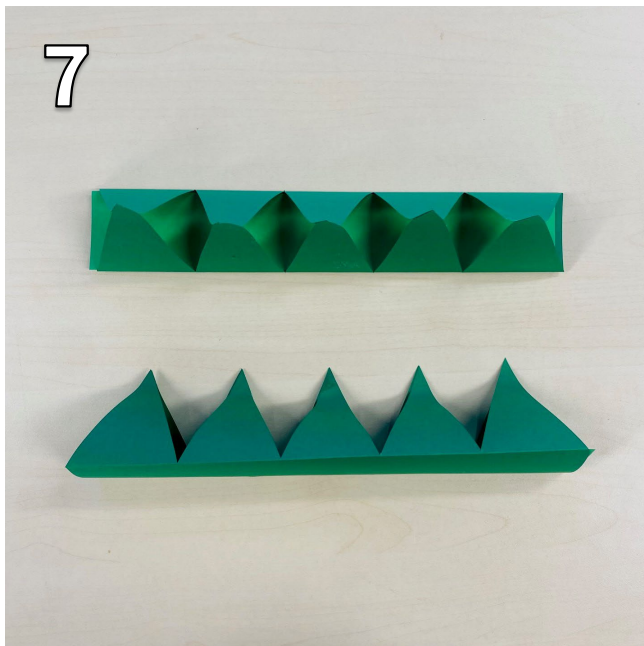

Fold both spike templates into three as above. It's easier to fold outwards on the lines then fold inwards on the fold lines..

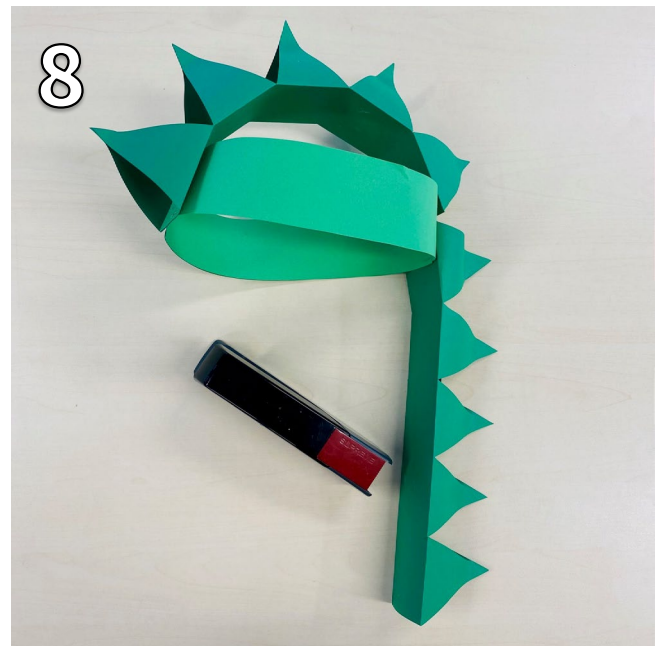

Cut out the spike templates.

Take the remaining two headband strips and fold the spikes around the strips

Glue the tips of the spikes together. (you might need to hold them together for a few seconds).

Staple one strip to the top of the headband and the other to the back. This can be a bit fiddly – best done by an adult! (Make sure the smooth part of the staple is in on the inside again). **Wear your headband and stomp and roar like a dinosaur!**
